Professional Connectors & Cables
Revolutionizing the Future of Entertainment Together

Single Crystal Copper OCC Audio Cables

Model: A2M6-OCC

Model: A2S8-OCC

- Made with single crystal copper OCC, producing the world's top audio cables.
- During the transmission process, various audio and video signals passing through grain boundaries cause reflection and refraction, leading to signal distortion and attenuation. The minimal or absent grain boundaries in single crystal copper fundamentally improve transmission quality. Therefore, in the field of high-end audio and video equipment, we create the world's top connectivity solutions.
- Backbone of the national audio-visual connection industry.
- Let the world experience GST Cables.
- The world's top audio and video connection line.
- A2M6-OCC Single Crystal Copper Signal Cables: 0.10(128)2x40/0.10 O.D.6mm.
- A2S8-OCC Single Crystal Copper Audio Cables: 0.10x240x2 O.D.8mm.

Features

- High purity 99.9999%
- OCC

A608X1/OCC

A608X2/OCC

A608AX/OCC

Backbone of national video and audio connection enterprise
Let the world feel GST GEAR.

The world's top audio and video cables

Sufficient core sufficient meter/National standard certification

GST GEAR

GST GEAR cables is dedicated to the production, research and development, and sales of cables in three major fields: low-voltage cables, high-voltage cables, and integrated wiring. The product range includes: audio cables, speaker cables, HDMI fiber optic cables, HDMI high-definition cables, power cables, DMX signal control network cables, coaxial cables, flat cables, and various types of composite cables.

Microphone Cables

Features:

- The core wire is made of 99.99% OFC (Oxygen-Free Copper) stranded material.
- The cable sheath is made of PVC material, offering excellent wear resistance, acid and alkali resistance, and oil resistance.

Specification:

Model	Sheath Color	Core Structure	Shield Type	O.D
JM001	BK	(400.10BC)x2+AL+BD(128/0.10BC)	Braided	6mm
JM003	RD/BU/PL/OG/YL/BK	(32/0.10BC)x2+AL+BD(96/0.1BC)	Braided	6mm

Features:

- The core wire conductor is made of oxygen-free copper strands, offering excellent oxidation resistance and low attenuation. The sheath is made of elastic PVC, with internal filling of tensile cotton yarn. The spiral shielding provides more flexibility compared to braided shielding, making it resistant to twisting and preventing brittleness.

Specification:

Model	Sheath Color	Core Structure	Shield Type	O.D
JM004	RD/BU/PL/OG/YL/BK	(32/0.10BC)x2+AL+BD(96/0.10BC)	Spiral	6mm
JM006	BK	(18/0.10BC)x2+AL+BD(64/0.1BC)	Spiral	6mm

Features:

- The outer shielding of the core wire is made of tinned copper with high-density braiding. The 95% copper mesh effectively reduces electromagnetic noise. The outer sheath is made of elastic PVC, which feels soft and has bright colors.

Specification:

Model	Sheath Color	Core Structure	Shield Type	O.D
A2M6	BK	(400.10BC)x2+AL+BD(128/0.10TC)	Braided	6mm

Features:

- The core wire consists of four pairs of twisted strands, with the outer shielding made of tinned copper wire with high-density braiding. The mesh design distributes the bending force evenly across each copper strand, providing approximately 95% shielding efficiency. The material is resistant to oxidation, which helps extend its lifespan.

Specification:

Model	Sheath Color	Core Structure	Shield Type	O.D
A4M6	BK	(28/0.10BC)x4+AL+BD(128/0.10TC)	Braided	6mm

Microphone Cables

Features:

- The core wire conductor is made of oxygen-free copper strands, providing excellent oxidation resistance and low attenuation. The sheath is made of elastic PVC, with internal tensile cotton yarn filling. The spiral shielding is softer than braided shielding, offering better resistance to twisting and preventing brittleness.

Specification:

Model	Sheath Color	Core Structure	Shield Type	O.D
JA5500	BK	(32/0.10)x2+SD(40/0.10BC)	Spiral	5.0/10mm

Features:

- The ultra-thin PVC sheath has a diameter of 4mm, making it suitable for engineering wiring and saving conduit space. The professional twisting technology ensures high flexibility and excellent resistance to twisting.

Specification:

Model	Sheath Color	Core Structure	Shield Type	O.D
JM008	BK/GY	2x400.10+40/0.10Tin	Spiral	4mm
JM011	GY	2x400.10+96/0.10Tin	Spiral	4mm

Features:

- The dual shielding combines copper braided shielding with semiconductor shielding, with the outer layer of the core wire wrapped in conductive material. Due to the thicker PVC sheath, strain is reduced, and the cable offers good bend resistance.

Specification:

Model	Sheath Color	Core Structure	Shield Type	O.D
AG-6	BK/BU/OG	128/0.10+BD(128/0.10)	Braided	6mm
JG005	BK	50/0.10+BD(96/0.10)	Braided	6mm

Features:

- The twisted sheath speaker cable uses oxygen-free copper strands, effectively reducing radiation noise. The insulation material lowers conductivity and compensates for frequency response characteristics.

Specification:

Model	Sheath Color	Core Structure
JA300	GY	2x1.0mm ²
JA301	GY	2x1.5mm ²
JA302	GY	2x2.0mm ²
JA303	GY	2x2.5mm ²

Model	Sheath Color	Core Structure
JA305	GY	2x4.0mm ²
JA308	GY	4x2.5mm ²
JA309	GY	4x4.0mm ²

Audio Cables

Features:

- Elastic PVC sheath with cotton yarn filling, oxygen-free copper wire bundles twisted, compact, moisture-resistant, and low-temperature resistant.

Specification:

Model	Sheath Color	Core Structure	O.D
JA102	Black Dark Blue	2x1.0mm ²	8mm
JA103	Black Dark Blue	2x1.5mm ²	8.5mm
JA104	Black Dark Blue	2x2.0mm ²	9mm
JA105	Black Dark Blue	2x2.5mm ²	10mm
JA106	Black Dark Blue	2x4.0mm ²	12mm
JA107	Black Dark Blue	4x1.0mm ²	10mm
JA108	Black Dark Blue	4x1.5mm ²	11mm
JA109	Black Dark Blue	4x2.5mm ²	12mm
JA110	Black Dark Blue	6x1.5mm ²	12.5mm
JA111	Black Dark Blue	6x2.5mm ²	14.5mm
JA112	Black Dark Blue	8x1.5mm ²	14mm
JA113	Black Dark Blue	8x2.5mm ²	15.5mm
JA114	Black Dark Blue	4x2.0mm ²	11.5mm
JA115	Black Dark Blue	4x4.0mm ²	14.2mm

Features:

- High-quality transparent double-row speaker cable, oxygen-free copper/tinned copper conductor, soft PVC outer sheath.
- Conductors bare copper/tinned OFC.

Specification:

Model	Sheath Color	Core Structure	O.D
JA2003	Transparent	2x50x0.10mm ²	3.06.0mm
JA2004	Transparent	2x100x0.10mm ²	3.57.0mm
JA2005	Transparent	2x150x0.10mm ²	4.08.0mm
JA2006	Transparent	2x200x0.10mm ²	4.28.4mm
JA2007	Transparent	2x250x0.10mm ²	4.48.8mm
JA2008	Transparent	2x300x0.10mm ²	4.69.2mm

Features:

- Elastic PVC sheath, oxygen-free copper conductor, flat shape, easy installation.

Specification:

Model	Sheath Color	Core Structure	O.D
JA510C	Wine Red	2x100x0.08mm ²	3.67.2mm
JA5150	Wine Red	2x150x0.08mm ²	4.08.0mm
JA5200	Wine Red	2x200x0.08mm ²	4.48.8mm

Multicore Audio Cables

Features:

- Elastic PVC outer sheath, each channel independently shielded with aluminum foil and copper mesh for high noise reduction, ideal for stage performances and AV installations.
- Internal guiding wire for easy and convenient termination, with environmentally friendly polyethylene elastic insulation, offering softness, toughness, and excellent electrical insulation.

Specification:

Voltage	Must Withstand at DC 125V/15sec.
IMPEDANCE(Ω)	214Ω/KM
Applicable Temperature	-20°C~70°C(-4° F+158° F)
PART NO	200.100FE
CONDUCTOR SIZE	0.16MM(25AWG)
DETAILS	[(200.100FC+PE1.1)*2C+DW7/10.15TC+A LFOIL+PVC3.0]*CHANNEL+JACKET PVC

DJ050	50	31mm

DJ004C

Six Dual-shielded 2-8 Channel Network Cables

Features:

- Elastic PVC outer sheath, each channel shielded with aluminum foil + copper mesh; precise twisting control effectively eliminates signal crosstalk and reduces attenuation.
- Reduced return loss, improved electrical performance, and resistance to external electromagnetic interference, ensuring high-speed and stable signal transmission.
- Finished network cables pass Fluke testing, with stable crimping and 100% performance testing, making it the best choice for rental screens.

Specification:

Order Code	Channel	Length
DC-CAT6-2	2	20m
DC-CAT6-2	2	30m
DC-CAT6-2	2	50m
DC-CAT6-2	2	80m

DC-CAT6-6	6	50m
DC-CAT6-6	6	80m
DC-CAT6-8	8	30m
DC-CAT6-8	8	50m
DC-CAT6-8	8	80m

Coaxial Line

Features:

- Standard coaxial cable design for high-speed signal transmission, with dual-layer shielding to reduce interference, resulting in clearer image quality with minimal signal attenuation.
- Shielding: Aluminum foil + 99.99% tinned oxygen-free copper wire with ultra-dense braided shielding, effectively blocking external interference and reducing crosstalk and return loss.
- Core wire: 99.99% oxygen-free copper, oxidation-resistant, low attenuation, and fast transmission speed.
- Sheath: High-elastic PVC environmental insulation layer, soft, durable, non-brittle, wear-resistant, oil-resistant, and corrosion-resistant, extending the cable's lifespan.
- PE transparent insulation layer, low eccentricity, reduces crosstalk, and prevents electrical breakdown.
- Meter markers: Bidirectional meter markers with clear printing, ensuring accurate measurements to reduce errors, saving time and labor during installation.
- Compliant with international standards, providing reliable use.
- ROHS 2.0 Enhanced Certification.
- ISO9001:2015 Certification.

Specification:

Model	Shield Type	Core Structure	O.D
50-3	128 Braided	(20/0.20BC)BD+(128/0.10BC)	Φ5.3mm
50-5	144 Hyper Braided	(55/0.20BC)BD+(144/0.10BC)	Φ7.3mm
75-3	128 Braided	(7/0.20BC)BD+(128/0.10BC)	Φ5.5mm
75-5	144 Braided	(31/0.20BC)BD+(144/0.10BC)	Φ7.3mm

Eight Core Hand in Hand Conference Microphone Line

Features:

- The conductor is made of high-purity OFC oxygen-free copper, offering low signal attenuation, minimal signal loss, and high transmission speed for complete signal transmission.
- The sheath and insulation layer use new plastic materials, offering excellent wear resistance, acid and alkali resistance, oil resistance, and a long service life.
- Aluminum foil + braided double-layer shielding, with low loss and better audio transmission quality.
- **Application fields:** Amplifiers, audio equipment, and more. Suitable for home use, karaoke, conference rooms, public address systems, and other audio engineering projects.

Specification:

Model	Shield Type	Core Structure	O.D
JM800	128 Braided	(7/0.19BC)BD+(128/0.10BC)	Φ6.8mm

Stage Lighting Flat Cable

Application:

- Suitable for multi-functional lighting suspension rods' vertical folding wiring and horizontal centralized wiring in large venues such as television studios, theaters, and sports arenas. It offers easy and neat cable deployment with a simplified and aesthetically pleasing wiring space.
- The system can be customized to combine with 3-core or 5-core DMX512 signal cables, Cat 5e or Cat 6 shielded network cables, and fiber optic cables as per customer requirements.

Flame Retardant Cable for Stage Design

Features:

- High-quality flame-retardant cables for stage lighting, with an environmentally friendly, flame-retardant elastomer sheath that offers excellent flame resistance, flexibility, and wear resistance.
- Thick, high-precision oxygen-free copper conductors with larger cross-sectional areas for higher current carrying capacity and lower resistance.
- Manufactured with advanced equipment and strict quality control, ensuring low eccentricity and uniform outer sheath thickness to prevent electrical breakdown and ensure electrical safety.
- Consistent appearance with uniform thickness and clear cable markings to ensure accurate length.
- High-quality flame-retardant cables for stage lighting, serving global broadcast institutions, sports venues, theaters, concert halls, conference rooms, KTV, and other locations.

Plug-in Cable for Performance System

Features:

- High-quality flame-retardant cables with an environmentally friendly, flame-retardant elastomer sheath, offering superior electrical performance, aesthetic appeal, and corrosion resistance.
- Thick, high-precision oxygen-free copper conductors with larger cross-sections for higher current capacity and lower resistance.
- Customizable with various connectors to meet user needs, widely used in TV stations, theaters, sports venues, and performance spaces. Ideal for powering silicon boxes, dimmer cabinets, and quick lighting wiring.

RVVP Double Shield (Engineering) Cable RVVP

Features:

- RVVP type polyethylene-insulated, PVC-sheathed, double-shielded power cable.
- Uses aluminum foil and 99.99% oxygen-free copper braided shield for effective external interference shielding and minimal crosstalk loss.
- Made from special PVC material, offering excellent insulation and high tensile strength.

Application Area:

Suitable for communication, audio, broadcasting systems, computers, instruments, electronic devices, and automation equipment requiring shielded cables to prevent interference.

Specification(RVVP/RVSP/WDZRVVP /WDZRVVSP):

Nominal Cross Sectional Area of Conductors(mm ²)	Number /Diameter of The Core(mm)	Average Dia. (mm)		Reference Weights (Kg/Km)		Conductor Resistance at 20°C (Ω/Km Max.)

Special Power Cord & Combination Cable

Combination cables of power cables and signal cables.

Power cord and network cable combination cable.

Power cord network cable combination cable.

Network cable combination cable.

Spring cable of various specifications.

Advanced shielded power cord.

Combination cables of power cables and signal cables.

4CH Audio/DMX or network cable extender.

Recording sound card analog audio DB25 switching cable.

Power Box Series

Application:

- The High-end Power Cabinets: Ensuring Safety for Every Stage Event.
The through-power distribution box features a dual-layer shockproof casing with a reinforced base, making it durable and ideal for mobile performances. All components, including connectors, circuit breakers, and wires, are assembled with high-quality, renowned brand parts, ensuring stability during use. Standard configurations include a voltage and current meter, LED lighting, multifunction sockets, and a premium dust cover for power inputs, designed for user convenience.

Features:

- High-quality dual-layer shockproof casing with silent wheels
- Weipu 16A 3-pin waterproof socket
- High-end 19-pin female output
- Conni 400A Rhino plug input
- Transparent, high-quality Conni protective cover for inputs
- Delixi circuit breaker
- Clearly marked layout for circuit breakers and corresponding controlled outputs
- Maximized output with minimal height control
- Standard configuration with dual-sided U-shaped LED lighting
- Standard configuration with phase-separated output circuit indicator lights
- Standard configuration with a three-phase voltage and current integrated meter
- Standard configuration with multifunction sockets for balanced three-phase output
- National standard high-quality flame-retardant cables
- Organized wiring, reasonable layout, and easy maintenance

CAT5E Network Cable

Application:

- This series of products is widely used in various network cabling structures and transmission media, including audio, digital, text, image, and video communications, suitable for high-speed, high-capacity, secure, and confidential local network environments.

Features:

- IEC 61156, TIA 568-C.2, YD/T 1019-2013, ISO/IEC 11801
- Operating temperature: -20° C to +70° C
- Complies with TIA 568-C.2 standards for 100MHz testing, expandable to 350MHz, with a transmission frequency of 100MHz.
- Widely applied in network integrated cabling and digital communication, supporting intelligent transmission with high speed and stability, fully supporting duplex network signal transmission in smart building cabling installations.
- Conductors made from high-purity refined copper using high-end integrated forming equipment, ensuring minimal signal insertion loss, fast speeds, and high transmission rates with broad bandwidth.
- Outer jacket made from high-quality PVC material, enhancing product longevity.
- Available in UTP (unshielded), FTP (single-shielded), and SFTP (double-shielded) product types.

Super 6 types 4 Pairs Bi-braiding cable

CAT6/CAT6A Network Cable

- Conductors are made from high-purity refined copper using high-end integrated production equipment, ensuring minimal signal insertion loss, fast speeds, and high transmission rates with broad bandwidth.
- The outer jacket is made from high-quality polyvinyl chloride (PVC), enhancing product longevity.
- The special cross-frame structure maintains stable cable pair positioning, reducing crosstalk and maintaining stable impedance.
- The **Category 6** product series includes UTP (unshielded) and SFTP (double-shielded) types, while the **Category 6A** series includes UTP (unshielded), FTP (single-shielded), and SFTP (double-shielded) types.

Application:

- This series of products is specifically designed to address crosstalk between cables in Gigabit Ethernet cabling systems, featuring twisted pairs and a unique cross-shaped structure with shielding.
- The design provides excellent shielding and electromagnetic interference resistance, making it widely applicable in large-capacity network cabling structures and high-point transmission media such as audio, digital, text, image, and video communications in high-speed, high-capacity, secure, and confidential local network environments.

Features:

- IEC61156 TIA568-C.2 YD/T1019-2013 IS011801
- Suitable for -20° C to +70° C.
- Category 6 Cables comply with TIA 568-C.2, tested at 250MHz and expandable to 550MHz. Category 6A Cables comply with TIA 568-C.2, tested at 500MHz.
- Intelligent transmission, high speed, and stability, fully supporting duplex network signal transmission, with transmission frequencies of 250MHz/500MHz. Widely used in network integrated cabling, digital communication networks, and smart building cabling installations.

Passed the Fluke test

Super 8 Types 4 Pairs Bi-braiding cable

Application:

- Utilizes triple-layer co-extruded physical foaming technology to reduce attenuation, resist oxidation, and ensure faster transmission during 10G data transfers.
- Features 4N-grade oxygen-free copper cores with single-strand copper wire diameters of 0.60mm ± 0.02mm. Thicker wires result in lower electrical resistance and better transmission performance.
- Precisely controlled twist pitches effectively counteract crosstalk between pairs, reduce attenuation and return loss, and enhance the cable's electrical performance while resisting external electromagnetic interference for high-speed, stable signal transmission.
- Ideal for high-speed broadband environments such as data centers and bandwidth-intensive locations. Despite shorter transmission distances, it offers distinct advantages.
- Category 8 cables can share RJ45 ports, enabling seamless upgrades from 1G to 10G, 25G, and 40G network speeds.
- These cables are plug-and-play and can be terminated on-site like other cable categories, making deployment easy.
- In practical use, Category 8 cables are more convenient than optical fiber jumpers for 25G/40GBASE-T networks at transmission distances under 30 meters.

Features:

- IEC61156 TIA568-5YD/T1019-2013 ISO11801
- Suitable for -20° C to +70° C.

Network Cable Jumper

CAT6 shield cable

CAT6 shield cable

Network cable jumper

Features:

- Multi-strand conductor structure, making the jumper cable flexible, easy to bend, and resistant to breakage.
- Gold-plated crystal head contacts ensure excellent performance.
- Extended, gradient stress design of the jacket, non-slip and tensile-resistant, ensuring a specified bending radius.
- Interlaced pin design reduces crosstalk.
- Unique anti-hook jacket design for easy use.
- Available in various lengths and colors for easy color management.

Application Area:

- Cabinet jumpers, structured cabling, office wiring in complex electromagnetic environments, and environments requiring shielding as per specifications.

CAT5 Network cable jumper

Features:

- Supports 2000MHz wide frequency, 40Gbps light-speed transmission rate, ultra-high bandwidth.
- Three-layer co-extruded physical foam technology reduces attenuation, resists oxidation, and speeds up transmission during 10Gbps transmission.
- Each pair of conductors features independent aluminum foil shielding, oxygen-free copper grounding wire double shielding, tin foil full-wrap triple shielding, and tinned copper braid quadruple shielding, reducing crosstalk between conductors.
- 4N-grade oxygen-free copper conductors. Single copper wire core with a diameter of $0.60\text{mm} \pm 0.02\text{mm}$, precise four pairs, 8-core twisted pair structure, improving the cable's electrical performance and resisting external electromagnetic interference, ensuring stable and high-speed signal transmission.
- The connector uses a 40Gbps light-speed transmission rate, Class 8, metal shielding outer shell, with gold-plated tri-chip design to reduce external electromagnetic interference and maintain stable performance; designed for crimp-free usage.
- Tested with Fluke instruments.

Application Area:

- Cloud data centers, enterprise network wiring, home NAS networks, high-end internet cafes, network live streaming, high-fidelity audio/video equipment, etc.

Stage Box

TW1

Introduction:

- This series, built in an epoxy-finished metal box, features small weight and dimensions, thanks to its professional printed circuit.
- High-quality XLR contacts with nylon connectors.
- The nickel-plated steel cable bale and grip securely hold multi-pair cables.

Order Code	Channel	Specification	Length
TW1-6	6	6 xlr male to 6 xlr female	5m/10m/15m/20m
TW1-8	8	8 xlr male to 8 xlr female	25m/30m/40m/50m

Stage Box

TW2

TW3

Introduction:

- This series of stage boxes are made of high-quality aluminum alloy. The snake cable is covered with black and blue heat shrink sleeving, and all the terminal plugs are numbered by silkscreen.
- Professional soldering and assembly technology ensures high-quality signal transmission.
- Custom-made options are available.

Order Code	Channel	Specification	Length
TW2-8	8	4 xlr male+4 xlr female to 4 xlr female+4 xlr male	20m/30m/50m

2-8 Channel Network Cable Car

Introduction:

- Elastic PVC outer sheath with aluminum foil + copper mesh shielding for each channel. Precise twisting pitch controls crosstalk, reduces attenuation and echo loss, improves electrical performance, and resists external electromagnetic interference, ensuring stable high-speed signal transmission.
- Passed Fluke test, stable crimping, 100% testing, reliable performance.
- Finished network cables are ideal for rental screening.

VGA Cable

J1001

J1002

J1003

J1004

Introduction:

- VGA Male to Male Connection Cable, distortion-free transmission with a 3+6 core structure.
- Connectors are gold-plated, offering anti-oxidation properties and effectively enhancing signal transmission quality.
- Durable even after multiple insertions and removals.
- Equipped with a magnetic ring design to prevent interference from other electronic devices, enhancing EMI/RFI signal isolation and resolving issues like ripples and ghosting.
- Stylish appearance with PVC insulation for both the outer sheath and core, providing flexibility, toughness, and environmental flame retardancy.

	30AWG(Copper cable is single-stranded, with a diameter of 0.25 millimeters.)

8K certificate"

Version: Standard HDMI2.0

- True 4K, compliant with international HD cable manufacturing standards: Officially certified by HDMI Association members.
- Supports 3D video, Dolby Atmos / DTS:X, and ARC audio return signal.
- Resolutions: Fully compatible with 4K, 2K, 1080P, and other resolutions.
- Color values (YUV/RGB): 4:4:4 / 4:4:2 / 4:4:0, fully supports picture clarity at 60Hz, making it a top choice for gamers with high dynamic resolution and 4K HDR, supporting ultra-high-definition color dynamic contrast.
- HDCP: Supports HDCP 2.2 / HDCP 1.1 backward compatibility.
- Bandwidth transmission: 18Gbps.
- HDMI interfaces: Standard HDMI head + MICRO HDMI head, can pass through a 22mm engineering pipe diameter.
- True gold-plated connectors, highly elastic flame-retardant sheath.
- Passes six durability tests: terminal, wire 10,000 insertion/removal cycles, 25KG weight hanging test, 24-hour salt mist test, and 4K playback test still ensures the product is in good condition.
- Complies with international environmental standards, with multiple certificates for peace of mind: ROHS 2.0 enhanced version certification, ISO 9001:2015 certification.

HDMI 2.0 version

J2001

J2002

Introduction:

- 100% fully digital, no compression, no video conversion.
- The wire core uses 28AWG high-quality oxygen-free copper, with a standard 19+1 core structure.
- HDMI 2.0 / 2.1 version, supports 3D playback, supports 4K/2K resolution at 18Gbps, 3840x2160p. Suitable for video signal cable conversion between computers, Blu-ray DVDs, digital TVs, projectors, etc., enabling easy conversion between DVI, DP interfaces, and HDMI interfaces.
- Supports Ethernet channels for synchronous searching or downloading, with audio feedback channels, high-speed bidirectional communication, direct transmission of TV audio to the A/V amplifier, and automatic audio and video sync processing.
- Supports expanded color space, perfectly rendering professional digital camera quality.

HDMI Cable Testing Steps

J2001

- molded HDM 19pin male to male cable.
- Length 1/2/3/4/5/7/8/10/15/20m.
- HDMI 2.0 version 4Kx2K 18Gbps HDMI

J2002

- molded HDMI19pin male to male cable, dual color.
- Length: 1/2/3/4/5/7/8/10/15/20m.

HDMI Optical Cables

J2008 4K

J2008 Converter 4K

J2009 8K

J2020 VGA-GDMI Converter 4K

Version: Standard HDMI 2.0

- True 4K, compliant with international high-definition cable manufacturing standards; officially certified by the HDMI Association.
- Supports 3D video, Dolby Atmos/dts:x, and ARC (Audio Return Channel) signals.
- Resolution: Fully compatible with 4K, 2K, 1080P, and other resolutions.
- Color value (YUV/RGB): Fully supports 4:4:4, 4:4:2, and 4:4:0 color spaces.
 - ★ Image detail: 60Hz, ideal for avid gamers.
 - ★ Image quality degradation: Nearly zero attenuation, optical fiber transmission unaffected by electromagnetic interference.
 - ★ High dynamic resolution: Supports 4K HDR, providing ultra-high-definition color dynamic contrast.
- HDCP: Supports HDCP2.2/HDCP1.1 backward compatibility.
- Bandwidth transmission: 18Gbps.
- Optical fiber core: 4mm, slim, flexible, and easy to route.
- Weight-bearing and tensile strength: Tested for 25KG weight bearing, tensile and swing resistance, and high-temperature endurance up to 75° C.
- HDMI interface: Standard HDMI head + MICRO HDMI head, capable of passing through 20mm engineering conduits; detachable head can pass through 14mm engineering conduits.
- Copper shell gold-plated connector, high-strength zinc alloy shell, high-elastic flame-retardant jacket.
- Compliant with international environmental standards, offering peace of mind with multiple certifications: Enhanced version of ROHS2.0 certification and ISO9001:2015 certification.

Product Description:

- 3-pin XLR male (female) connectors.
- Brand new button design.
- Unique cage insertion contact.
- Positionable cable clamp.
- Internally threaded tail protector.
- Five color-coded rings available.

Electrical Performance :

- Contact resistance: less than 0.01 Ω
- Insulation resistance: greater than 2000 Ω
- Withstanding voltage: AC250V 50Hz

Other Features :

- Durability (plug/unplug cycles): >1200 times
- Operating temperature: -30°C to +80°C

Remark:

- All accessories come with SGS test reports.
- The product complies with ROHS environmental standards.
- The product has obtained CE certification.

Performance:

- Rated current: 16A
- Rated voltage: 50V AC
- Insulation resistance: >100GΩ
- Insulation strength: 1.5KVAC
- Service life: >2000 times

Product Description:

- The entire product is made of copper, except for the insulation.
- Unique design with a locking function.
- All contacts are gold-plated.

BNC Connector

T153

T155

Product Description:

- The shell is made of aluminum alloy, machined with a turning process, and treated with electrophoretic surface technology.
- Soldering-type digital HD video connector.
- The PTFE insulation layer with an air gap ensures stability.
- 75-ohm impedance beryllium copper external contact ring, resistant to frequent mating cycles.
- Ergonomically designed for a comfortable grip.

Product Description:

- Standard D-type installation size.
- Can be externally or internally mounted.
- Gold-plated contacts.
- The shell can be plated in white or black.

Performance:

- Rated current: 16A
- Rated voltage: 50V AC
- Insulation resistance: >5GΩ
- Insulation strength: 0.5KVAC
- Service life: >2000 times

Product Description:

- BJ45 plug, designed for harsh environments.
- Ensures stable signal connection, preventing disconnection or loosening.
- Hard zinc alloy shell to protect internal components from damage.
- Available in black and white for shell color options.

Product Description:

- Fixed installation RJ45 interface.
- The rear pins are available in parallel (T205) and vertical (T206) versions.
- The T208 series rear end features an intelligent disk controller.
- Can be mounted from the top or from inside.

Performance:

- Number of contacts: 8
- Rated current per contact: 1.5A
- Rated voltage: <50V AC
- Contact resistance: <10mΩ
- Insulation resistance: >500MΩ
- Insulation strength: >1000VACrms
- Cover frequency: 1-100MHz

Product Description:

- This product is suitable for audio and video connections.
- D-type mounting size.
- Made with high-quality conductive materials and imported plastic injection molding.

Product Description:

- Available in 9-pin and 15-pin versions.
- Offers "male-to-female" and "female-to-male" products.
- Integrated molding for minimal signal attenuation, supporting high-definition video signal transmission.
- Compact and convenient design, easy to carry and use, plug and play.

Product Description:

- Lossless signal, stable transmission, plug and play, portable.
- 24K gold-plated connectors, Reach-compliant.
- All components made of environmentally-friendly, flame-retardant materials.

Product Description:

- Gold-plated pins for oxidation resistance and excellent contact performance.
- Standard wiring sequence, made from high-quality PC polycarbonate.
- Phosphor bronze wire clips with 1000 connection cycles.

Binding post/"Banana" plug

T631

T632

Product Description:

- High-end crystal binding post with a crystal shell and long tail, resistant to oxidation, minimal distortion, and high quality.
- The main part is copper, with a gold-plated surface, designed for audiophile DIY projects.
- Primarily used for amplifier chassis binding posts and speaker binding posts.

Performance:

- Professional banana plug with gold-plated contacts and a metal housing.
- The banana plug features a lantern-style structure with spring clips that expand outward to increase the contact area, improving transmission and elasticity.
- Unlike ordinary banana plugs, this one maintains elasticity even after pressure is applied.
- No soldering required, secured with dual-sided screws.

Adapter

Electrical Specification:

Contact resistance ≤5MΩ	Insulation resistance ≥5000MΩ	Withstand voltage 1400V
----------------------------	----------------------------------	----------------------------

Mechanical Property:

Axial fixation: 210N	One foot splitting force: 85+1g	Insertion and extraction force: 10-80N
----------------------	---------------------------------	--

Product Description:

- Can be equipped with a 1:4 isolation transformer, impedance 200:3.2k.
- Can be equipped with a 1:1 isolation transformer, impedance 200:200 (see diagram B).
- Sturdy aluminum alloy casing.
- Different sockets can be equipped according to different requirements (see Chart A).

Audio Transformer Specifications:

- 1:4 impedance ratio: 200:3.2k
- Source/Load impedance: 200/10k
- 1:1 impedance ratio: 200:200
- Source/Load impedance: 600/10k
- A low-cost solution for unbalanced/balanced line conversion and passive DI applications, where no earth or gain switching is required.
- Max. input level @ 50Hz at 1% THD: -3 dBu
- Max. input level @ 50Hz at 1% THD: -7 dBu

PASSIVE DIRECT INJECTION BOX

Introduction:

- DI001 is a passive, stand-alone direct injection box, ideal for bass guitars, acoustic instruments, electric guitars, keyboards, and synthesizers for audio signal pickup.
- The output is isolated by a transformer, and a ground lift switch is included to help combat ground loops. The left side is capacitor-linked to the ground, while the right side offers a full grounding chassis connection.
- It features very low harmonic and phase distortion, and its compact, rugged design ensures durability.

Specification:

Order Code	DI001
Freq. Response	0 - 2.8dB (20 Hz to 20 kHz)
Distortion	0.003% (0 dBu 1kHz)
Insertion Loss	<0.5 dB into 600 ohms load
	<0.01 dB into 50k ohms load
Construction	Metal
Dimension	103 x 69 x 35mm
Connections	XLR 3-pole male isolated Output
	6.35mm 2 pole jack Input
	6.35mm 2 pole jack Thru
	Ground Lift Switch (GND)

Introduction:

- DI002 is a premium direct box that combines two units in a single case. With its rugged, roadworthy construction and two shielded transformers, it provides high-quality signal connection solutions for a variety of live sound and recording applications. The DI002 is perfect for converting unbalanced stereo line level or instrument signals from keyboards, electronic drum kits, acoustic-electric guitars, and more.
- The Thru jacks allow you to tap off the signals from the inputs and pass them to amplifiers or monitors without affecting the original audio. This feature eliminates the need for miking guitar amplifiers, which may be preferable depending on your application.

Specification:

Order Code	DI002
Freq. Response	0 - 2.8dB (20 Hz to 20 kHz)
Distortion	0.003% (0 dBu 1kHz)
Insertion Loss	0.5 dB into 600 ohms load
	<0.1 dB into 50k ohms load
Construction	All metal construction with rubber feet
Dimension	122x105x40mm
Connections	6.35mm 2 pole jack Input x 2
	RCA Input x 2
	3.5mm stereo jack Input
	XLR 3-pole male Output + XLR 3-pole male Output Σ
	Ground Lift Switch (GND)
	MONO SUM Σ

Audio Noise Reduction Protector

The importance of a good audio connector:

A good audio connector is essential. Many live sound setups require laptops as audio players. However, the unbalanced signal from the laptop to the mixer has poor interference resistance and can cause ground loop noise, leading to serious hum from the speakers, affecting sound quality. This is a common issue for audio engineers.

This product isolates and reduces noise, solving hum caused by electrical interference. It features a scientific turn ratio, premium materials, and optimal impedance balance for perfect power and load matching.

It is ideal for live performance audio systems, isolating noise between the audio system, projectors, LED screens, and lighting equipment. It also reduces background noise in band setups.

The noise protector uses high-quality imported components, minimizing high-frequency loss while preserving the original sound quality, unlike most domestic isolation transformers that degrade high frequencies.

Applicable situation:

- Current noise
- Power interference
- Static isolation
- AC noise
- Ground loop potential difference
- Noise generated in broadcasting systems
- Common-source noise
- Simultaneous interpretation, video conferencing, TV conferencing
- Noise from mixing consoles connected to computers, LED video, cameras, and other systems
- Eliminate noise from simultaneous interpretation equipment and mixing consoles
- Eliminate noise from electronic instruments connected to the mixing console
- Eliminate noise from laptops connected to the mixing console
- Eliminate noise from cameras and amplifiers connected to the sound system
- Eliminate current noise generated by non-grounded equipment connections
- Improve sound quality and eliminate digital sound distortion
- Static isolation and lightning protection for mixing consoles
- Prevent high potential differences from damaging connections

HDMI SPLITTER

TH104 HDMI SPLITTER 1x4 VER 1.4
TH108 HDMI SPLITTER 1x8 VER 1.4
TH104B
TH108B

- The 1 to 4 HDMI splitter can connect 1 HD signal source to 4 HD display terminals. It can easily allocate a high-definition signal from a high-definition signal source to four monitors or projectors that support HD signals. In addition, the HDMI signal can be amplified when it is connected to a signal output terminal of an HDMI cable. This HDMI allocator can support all resolutions up to 3840x2160/30Hz.

Introduction:

- HDMI splitter 1 to 2. Let an HDMI port assign two HDMI ports to the HD video allocator.
- It supports 480p, 576p, 720p, 1080i, 1080p, 4Kx2K.
- Supports 3D video format.
- Supports audio encoding formats DTS-HD/Dolby True HD/LPCM 7.1/DTS/Dolby AC3/DSD.
- Fully compatible with HDCP.
- TH102A version 1.4.
- TH102B version 2.0. Max single link range 3840x2160p 60Hz.

TH102A HDMI SPLITTER 1x2 VER 1.4

Empty Wall Mount Panel

Features:

- High-quality brushed aluminum alloy panel, elegant and stylish.
- Sturdy and durable.
- Can be assembled with 1-4 D-type information modules in any combination.

Professional Wall/Floor Mounted Aluminum/Copper Box 86

Features:

- High-quality brushed aluminum alloy panel with a flat design, robust craftsmanship, and strong durability.
- Separate panel and bottom box design for easy installation and soldering.
- Hidden panel mounting screw holes, with two magnetic side strips for securely locking the edge panel, ensuring a neat appearance and convenient installation and removal.
- Modular functionality, allowing customizable assembly of 1-32 D-type audio and video information modules, including HDMI, USB, network, telephone, video, BNC, 3.5mm audio, 6.5mm audio, optical fiber, power, speaker, XLR, RCA, and TV connectors.

Cable Tester

Features:

- The cable tester is our intelligent, CPU-controlled tester, capable of checking seven types of typical sound connectors and their connecting cables for damage or incorrect wiring.
- Test results are visually displayed by LEDs.
- The power supply, a 9V battery, is installed in a slide-in compartment for easy replacement.
